RAPID INDUCTION
ACCURATE MEASUREMENT

·Highly sensitive infrared probe·

·Noncontact measurement·

·1 second can be measured·

Medical Infrared Thermometer
▶ AET-R1B1

LED Digital Display

The black display box focuses the reading, the screen no longer changes color, only bright font. reading clear, and easy to get the temperature value.

1 second
measurement

___

High sensitive probe, the temperaturecan be
measured in 1 second, after a measurement without
other operations, you can enter the next measurement
it is suitable for multi-person measurement or
multi-time measurement.

Authoritative Certification of CE/FDA

Ergonomic Design
Comfortable to Hold

Following ergonomic design rules,
the body is solid and stable,handiness,
comfortable grip, firm grasp

INFRARED THERMOMETER
Model: AET-R1B1
Power: DC 3.0V,2*AAA batteries
Measurement range:
32.0-42.2°C(89.6°F-108°F)
Alicn Medical Shenzhen Inc

Please keep this warranty card properly, It will not be reissued if lost.

Intended use

Thank you for purchasing our Infrared Thermometer, type
AET-R1B1. This Infrared Thermometer is a non-sterile,
reusable, handheld device. It can be used by consumers in
homecare environment and doctors in clinic as reference. It
is intended for measuring human body temperature of three
months and above of people by detecting infrared heat from
the center of the forehead.
-For safe and proper use of this product, be sure to read and
fully understand Safety Precautions contained in this user
manual.
- Keep this manual with you for a convenient reference.
- Keep this manual in a proper way and avoid any loss.
- If you need other information, please contact the
manufacturer (See the PRODUCT INFORMATION).

Quick Start Guide

The correct measurement
method to follow:
Measure the forehead.
Distance 15mm to 50mm

Correct measurement method

1. Turn the thermometer on by pressing
the " SCAN/ ⏻ " button. To choose mode
press "SCAN/ ⏻ " on the shutoff mode.
A beep sound will be heard following
which the screen will indication with---℃
indicating the unit is ready for use.

2. Place the thermometer probe point
near the forehead and press "SCAN/ ⏻ "
and release after ~ 1 second and the
thermometer will beep and display the
accurate temperature. Whenever
consecutive readings are required,
please wait for at least 5 second. The
above procedure can be repeated as
many times as required.

3. To turn off the device press and hold
the " SCAN/ ⏻ " switch for ~ 5 seconds
and the thermometer will turn off
automatically after ~ 60 seconds.
